

The background of the lower half of the image shows the silhouettes of two oil pumpjacks against a green gradient background. The pumpjacks are dark and detailed, showing the walking beam, counterweight, and base. The background transitions from a lighter green at the top to a darker green at the bottom.

**Cost Effective
Innovative Technologies
for a Cleaner Environment**

The expertise of Scaltech's process engineers, coupled with extensive plant design, construction and operating experience, and our own proprietary technologies, enables us to offer the safest, most cost effective solutions for the treatment and disposal of oily waste and contaminated soil of any service provider in the industry.

OUR COMMITMENT

Scaltech International is a US based company with a strong commitment to providing innovative and sustainable technologies for a cleaner environment. Founded in 1986 in Houston, Texas to provide waste management services to the refinery industry, today Scaltech is a leading provider of petroleum waste treatment and environmental remediation.

In addition to providing technical and operating expertise, Scaltech believes that developing a true partnership approach with our customers is the key to long term mutually beneficial relationships.

Scaltech's goal is to solve problems and to work as a partner with its customers to find the best solutions at the best possible price. Scaltech's cost effective technological development, oily industry expertise, and extensive operational experience in combination with our partnering approach clearly sets Scaltech apart as the industry leader.

CLIENTS BENEFITS

- Our process capacity and treatment technology are selected to meet the requirements of each individual customer.
- We provide pricing that accommodates all expected situations with no surprises or hidden costs.
- We provide onsite quality assurance and quality control and will reprocess materials that do not meet specifications at no extra cost.
- Scaltech's proven technologies and processes are operated by full time personnel who are trained to operate safely and in full compliance with all existing regulatory requirements as well as additional requirements from our customers.
- For assurance purposes, Scaltech conducts surprise safety audits on each of its operations. In addition to Scaltech's extensive internal safety program, all operating personnel receive third party hazardous operations safety training.
